Wraps/Facials

Chocolate Body Wrap

A delicious natural wrap that chocoholics will love! All natural ingredients, including Cocoa Powder, cleansing Cinnamon and Ginger bask the skin in the sweet smell of chocolate as it cleanses the pores, rejuvenates and revitalises. All-natural ingredients and 100% Chemical Free.

Coffee Body Wrap

Our anti-oxidant Coffee Wrap helps improve circulation, overall wellbeing and is one of our most popular treatments. To obtain the perfect aroma the wrap uses freshly roasted Javanese Coffee Beans before blending them with Cinnamon Quills for the freshest Coffee Wrap available.

Javanese Lulur Treatment

Traditional Balinese and Javanese recipes are rarely seen outside of villages in Indonesia. We are excited to bring these Traditional Treatments to you, our treasured guest. Our Moisturisers, Scrubs and Wraps include Native Barks, Extracts and Essential Oils true to original recipes.

Exfoliation Treatments

Picture a dimly lit room filled with relaxing music. The Therapist arrives with a bowl of freshly ground Spices, Herbs and Botanicals and a small bowl of warm Coconut Milk. As you relax the Therapist blends the ingredients into an aromatic treatment. Soon the room fills with the rich aroma of Sweet Rice, Cinnamon, Sandalwood, Barks, Ginger, Turmeric and Coconut.

Vinothérapie Face and Body Exfoliation and Wrap

Vinothérapie combines traditional spa treatments with the benefits of Red Wine. We use a specialised spa treatment based on the benefits of the vine. Vinothérapie Treatments are the first Vinothérapie products to contain all aspects of the vine including Grapeseed Oil, Grapeskin Extract and Red Wine Extract. All are rich in Phytophenols and Resveratrol, which help fight against free radicals, the leading cause of premature ageing.

Lalaqui Tea Body Exfoliation

An essential part of a Lalaqui Tea Ritual is a rice based body scrub containing a combination of Thai Jasmine and Sweet Black Rice. It is rich in Natural Vitamins B12, C, and D as well as Oryza Extract, Antioxidants, Humectants and the unique aroma of our Lalaqui Essential Oil Blend.

Men's Face and Body Exfoliation and Wrap

Our Men's Face and Body Wrap draws toxins from the skin using all natural active ingredients, including Australian Clay, Humectants, Botanicals, Butters and Crystal ION 120 to detoxify and replenish the skin. Charcoal is a natural filter and purifier, Orange Peel and Lemongrass deodorise and Betel Leaf stimulates circulation and provides antiseptic properties. We use a pure Essential Oil blend of Ginger, Sweet Orange and Black Pepper providing a light, masculine aroma.

Chinese Cupping

Cupping is based on the meridian theory of the body. On one hand, cupping removes any stagnation in the body and opens the meridians so that qi ("chi") can flow freely. On the other, it also helps to rejuvenate certain meridians and organs that are not functioning at their best. From a scientific standpoint, cupping is known to help activate the lymphatic system, promote blood circulation and is good for deep tissue repair. Glass cups are generally used for cupping. Glass cups are fitted with a valve that attaches to a small hand-operated pump, allowing the practitioner to suck out air without having to rely on fire to depressurise the cup first. It also gives them greater control over the amount of suction.

Ear Candling

Remove wax build up in a natural, nurturing way.

Infrared Sauna

An infrared sauna uses infrared heaters to emit radiant heat which is absorbed directly into the human body, unlike traditional saunas which heat the body indirectly via air or steam.

Traditional steam saunas raise the temperature of the air to a very high level within the chamber to warm the body. Some people have difficulty breathing in this extremely warm air. Infrared saunas work differently. Instead of heating the air within the enclosure they heat the body directly. The result is deeper tissue penetration. The body perspires and receives all of the healthy benefits but avoids the harmful and extremely hot air of a traditional steam sauna. They are safe for all ages.

Heated Swim Spa Pool

Heated at approximately 36 degrees year round, this is the ultimate in muscle relaxation. Seating up to 12 adults comfortably, the 'Spa' end holds strategically placed hydrotherapy multi swirl jets which provide the effervescence of aeration. The spa functions as normal with bubbles, lights and heat. The 'Swim' end of the spa contains two jets producing a concentrated flow of water, suitable for swimming or walking on the spot. The water pressure can be regulated to accommodate most swimming strokes or skill levels.

The Endless Swim Spa offers exercise, relaxation and therapeutic massage all in one compact unit.
